Description:
This lecture and interactive lab workshop is designed to provide the participant with the opportunity to gain hands-on experience with study of the neuromusculoskeletal and vascular structures of the upper limb, utilizing multiple prospected cadavers (no dissection required).

Objective:
To improve and expand on the participant's knowledge of the anatomy of the upper limb as a basis for physical therapy examination and intervention of patients with upper limb dysfunctions.

Intended Audience:
Physical therapists, physical therapist assistants, and occupational therapists

Workshop Highlights
- 8 prospected cadavers available for study (no dissection necessary)
- ~80% of the course will be hands-on and interactive
- Experienced instructor & assistants to support participants
- Positive & personal atmosphere, well suited for mastery of information

Workshop Faculty
Cindy Holder Gill, PT, DScPT, MEd has been teaching Gross Anatomy at UMES since 1993.

Physical Therapy Teaching Assistants will assist the workshop participants and instructor. They are experienced & dedicated UMES DPT students & teaching assistants.
